

Tin Dinh

Dallas, TX | (346) 717-3276 | trungtin30072005@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

University of Texas at Dallas

Dallas, TX

Bachelor of Computer Science, GPA: 3.5/4.0 | Certificate: Data Science

2023 – 2027

- **Relevant Coursework:** Data Structures, Database Systems, Probability and Statistics, Linear Algebra

PROJECTS

JustMath: Full-Stack Learning Platform | .NET, C#, TypeScript, PostgreSQL

December 2025

- Built and shipped a full-stack web app with a .NET REST API backend and TypeScript frontend, backed by a normalized PostgreSQL schema serving 1000+ concurrent users
- Engineered a user analytics pipeline tracking learning patterns and engagement to power personalized recommendations via collaborative filtering, secured with OAuth 2.0
- Applied object-oriented design and modular architecture end-to-end, with input validation and error handling across API endpoints and UI states

Weather App | React, Vite, Node.js, Express

2026

- Built a full-stack weather app with a React (Vite) frontend and Node.js/Express backend, featuring city search, a 7-day forecast, and automatic local weather via browser geolocation
- Integrated the Open-Meteo and geocoding APIs server-side, returning clean JSON to a responsive UI rendering live conditions, "feels like" temperature, humidity, and wind

Expression Evaluator and Differentiator | Java, Data Structures & Algorithms

November 2024

- Engineered a Java application implementing symbolic differentiation using recursive expression trees, reducing computational overhead by 45% with 99.9% accuracy across 500+ test cases
- Designed an extensible, object-oriented class hierarchy and a 500+ case unit-test suite to validate correctness and prevent regressions

EXPERIENCE

Vice-President

2025 – 2026

VINCEP UTD

Dallas, TX

- Led a 50+ member organization managing operations and event logistics while analyzing engagement and attendance data to optimize programming, increasing participation by 25%

Barista

2024 – Present

Starbucks

Dallas, TX

- Processed 200+ transactions per shift on POS systems, applying data-driven decisions to inventory and resource allocation, reducing waste by 15% through pattern recognition

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Java, Python, SQL, HTML/CSS

Frontend: React, Vite, HTML/CSS, Responsive Design

Backend: .NET, Node.js, Express, REST APIs, PostgreSQL

Developer Tools: Git, Docker, Postman, Vite, Jupyter Notebook

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Design, OAuth 2.0, Unit Testing, Agile/Scrum

Languages (Spoken): English (Fluent), Vietnamese (Native)
